

Women's Surgery Ward

Women's Surgery ward is located on the 2nd floor in old building of Sina Hospital. This ward is equipped with 2 rooms containing 9 beds, 1 room containing 4 beds and 1 room containing 2 beds. A separate clean room and dirty room, toilets, examination room, medical equipment storehouse and a kitchenette have been considered for each ward.

Patients undergoing urologic surgeries such as, TURBT, varicocele, different types of hernia and other types of more complex surgical operations including nephrectomy, orthopedic surgeries, cosmetic surgeries, thoracic surgeries and other general surgeries like appendectomy and cholecystectomy are admitted in this ward.

Rooms have full facilities including air conditioning, digital TV, refrigerator. HIS system is also available in this ward which accelerate and facilitate sending samples and documents. All beds are equipped with a console, each of which includes a central oxygen and a nurse call system.

Moreover, patient-nurse interaction, paging in all rooms and recording date and time of patient-nurse interaction are also possible through nurse call system.
