

men's burn ward:

The men's burn ward in sina educational and treatment center, is located in the fourth floor of the burn building. This ward consists a total number of thirteen rooms. Five of them has two bed, six of them only beds and there are 2 isolated rooms.

Each and every room is furnished with a refrigerator, TV, a closet, a table, serum stalks and chairs. every room has it's own bathroom and WC; plus a cautionary system for each bed in case a nurse is needed.

In rooms with two beds there are dividing curtains in order to provide enough privacy for patients.

In it's current situation, this unit also has a reservoir, two stations, two sterile working rooms, two locker rooms, a dirty working room, a sterilization bathroom, two staff rooms, a physician's room, a nursery room and two kitchens. Both of the kitchens and working rooms have a refrigerator and each kitchen has an electrical stove.

Each bed consists of a mattress, sheet, pillow, coverlet, blanket and a bedside closet.

This ward is well equipped with a suitable heating and air conditioning system. Each and every bed has access to a central oxygen system, central suction system, cautionary system and a fluorescent lamp. a total number of nine extinguishers exists in this unit and it's waiting room. Two waiting halls are allocated for patient's visitors.

Due to the patient's special needs and sensitive condition, regular baths and dressing of the wounds are performed efficiently.
